#### 課程描述 Course Description

Have you ever wanted to understand certain phenomena or events happening in societies around the world? Are you aware that we are affected by what's happening around us and that what we do in our daily lives also shapes the world? English is more than a means of expression and communication; it is also a medium to understand and to investigate vital issues facing the world today. The goal of this course is to equip students with the critical capacity to comprehend, question, and analyze social, political, and cultural issues so that they would be able to form their own points of view in a logical and rational way without being judgmental or opinionated. Although this course provides intensive language training through reading, writing, and doing presentations, what is more important in this class is students' ability to make sense of the complexity of our contemporary world and to participate in the greater project of making the world more just and equal.

#### 課程目標 Course Objectives

- (1)To increase the breadth and depth of students' English reading comprehension in a variety of fields, and through contemporary culture.
- (2) To develope the student's ability to use English language sources efficiently in future professional endavors.
